Order from LCA or SLA mi\$2.40, ps\$3.30 AEC-tr-4341

Trans. of Russian mono. O Potere Puchika na
Predel'nom Radiuse v Fazotrone.

The resonance interaction between radial and vertical
oscillations in the vicinity of $n = 0.25$ is discussed.
Proof is established that this resonance is by far more
dangerous than the parametric excitation of vertical
oscillations, which is caused by the first harmonic of
the structure of the magnetic field. (Author)
